

3M™ IPP Impact Protection Profile

Description

3M Impact Protection Profile improves the overall performance of 3M Safety and Security Window Films. This unique window protection system combines the toughness of 3M patented micro/layer safety film with 3M's world-class expertise in adhesives to help shield against impact energy from severe weather, earthquakes, bomb blast, or forced entry events. The 3M Impact Protection Profile also helps protect against personal injury from flying glass.

3M VHB tapes high performance tape utilizes a very strong pressure-sensitive adhesive.

IPP creates a stronger barrier to help keep unwanted elements out (including water and debris from severe weather, smash and grab attempts of would-be intruders and flying glass due to bomb blasts).

Dimensions of Profile

BP 750	28 mm x 30.5 m
BP 900	38 mm x 30.5 m
Colour:	Black
Material:	Rubber
Adhesive:	VHB double tape with liner

Installation

3M IPP Impact Protection Profile installation available by professional and trained applicators.

Cleaning

3M Window films may be cleaned 30 days after installation using ordinary window cleaning agents at the same time as the window cleaning process.

General notes:

All 3M Safety films + IPP Impact Protection Profile have been tested to GSA and EXV25 as appropriate. For detailed information and relevant certification for any specific project, please contact your local 3M specialist.

All technical data is based on a combination of relevant European test methods and/or US test methods. Before using this product the customer / applicator must ensure the product is suitable to be used for the intended purpose. If there is any uncertainty, please check with your local 3M Window Film specialist. All issues regarding warranty and liability for the product and the effect of its use are governed in accordance with the provisions of the appropriate contract of sale unless local laws dictate otherwise.
