# CASPER™ CLOAKING TECHNOLOGY VIEW CONTROL + PRIVACY FILM

## COMPROMISED

## CLOAKED

Casper™ Cloaking Technology by Solarshield is an architectural film for glass walls that obscures digital screens to outside view.

It obscures digital screens to outside view, perfectly balancing openness and privacy in the workplace. It's the perfect confidentiality cloak.

### How Casper™ Cloaking Film Works

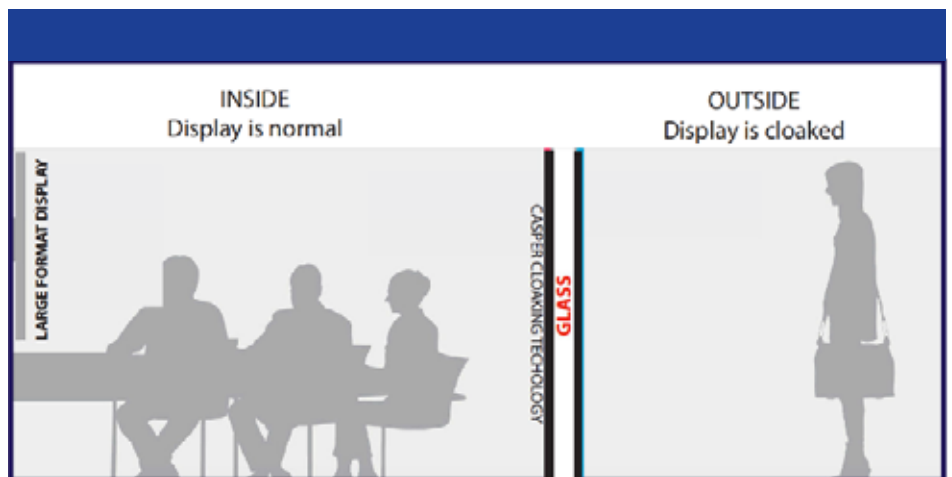

1. Casper selectively cloaks the light transmitted by LED displays, but nothing else.
2. To the viewer outside the room, everything but the content on the screens is clearly visible.
3. Transparent and opaque at the same time, it balances openness and privacy in the workplace.

# TRANSPARENCY IS EVERYTHING CONFIDENTIALITY IS EVERYTHING

Solarshield are a leading window treatment contractor and 3M's UK Master Window Film Dealer.

We are approved accredited installers for the world's largest manufacturers of window film.

We offer a nationwide survey, supply and installation service for high performance window films and graphics, glass containment, blind and window treatment systems.
