CASPER CLOAKING TECHNOLOGY BY DESIGNTEX VIEW CONTROL + PRIVACY FILM

COMPROMISED

CLOAKED

Casper™ Cloaking Technology by Designtex is installed by Solarshield. A unique Architectural Film for glass that obscures digital screens to outside view.

It obscures digital screens to perfectly balance openness and privacy in the workplace. It's the perfect confidentiality cloak.

How Casper™ Cloaking Film Works

1. Casper selectively cloaks the light transmitted by LED displays, but nothing else.
2. To the viewer outside the room, everything but the content on the screens is clearly visible.
3. Transparent and opaque at the same time, it balances openness and privacy in the workplace.

TRANSPARENCY IS EVERYTHING CONFIDENTIALITY IS EVERYTHING

Solarshield are the Casper leading window treatment contractor and approved Designtex installers.

We offer a nationwide survey, supply and installation service for high performance window films and graphics, glass containment, blind and window treatment systems.
